Valve Adjustment D12 Volvo Engine

D12 engine. From the design angle the new D12A engine was one of the largest engine projects from Volvo Trucks since the 1950s at the time. The basic design was still based on direct injection in-line six diesel engine around 12 litres displacement but with entirely different fuel and valve systems when compared with previous Volvo engines.

Volvo FH - Wikipedia

Turn the engine over until cylinder #2 exhaust valve closes and intake valve JUST starts to open. Just as #1 and #6 pistons were at TDC together #2 and #5 pistons are now at TDC. It will take 2 rotations of the engine to adjust all of the valves. Every 120 degrees of crankshaft rotation will position the engine properly for each adjustment.
