### Best High-Resolution Laptops - Consumer Reports

Resolution . Screen resolution, or native resolution, is the number of pixels on the display listed in the number across the screen by the number down the screen. Laptop displays look best when graphics are run at this native resolution. While it is possible to run at a lower resolution, doing so creates an extrapolated display.

### Choosing the Proper Display and Graphics on a Laptop

The best laptop screen resolution for a 15.6-inch display is 1920 x 1080-pixels, or Full High-Definition (FHD). More pixels = more detail and a more realistic rendering of visual content. Even if you're just surfing the net and not planning on watching movies or playing games. 1920 x 1080p gives you over 50% more pixels than a 1366 x 768 panel.
