Dinosaurs lived on Earth millions of years ago, long before our ancestors emerged on the face of the planet. These amazing animals boggle our imagination by their variety and size. Some were small like modern lizards, others as huge as a multi-storey building. Some were predators, for example the Tyrannosaurus Rex, Allosaurus, Velociraptor, Spinosaurus, while others were herbivorous - like the ...

Paleontologists presumed that the fossil eggs at Flaming Cliffs were laid by Protoceratops because it was the most common dinosaur at the locality where the eggs were found. However in the 1990s Museum expeditions discovered identical eggs, one of which contained the embryo of an Oviraptor, like dinosaur—which changed scientists' view of which dinosaur laid these eggs.

Dinosaurs, among other prehistoric creatures such as pterodactyls, were trapped alive in tree sap in the abandoned mines in the Gravity Falls Forest. The summer heat is causing the tree sap to melt, slowly releasing the dinosaurs and others from the sap. At the end of the Gravity Falls Main Title Theme, the pterodactyl makes an appearance in a photograph.
