Notum is a carboxylesterase that suppresses Wnt signaling through deacylation of an essential palmitoleate group on Wnt proteins. There is a growing understanding of the role Notum plays in human diseases such as colorectal cancer and Alzheimer's disease, supporting the need to discover improved inhibitors, especially for use in models of neurodegeneration. Here, we have described the ...

In this paper, the concept of social capital is introduced and illustrated, its forms are described, the social structural conditions under which it arises are examined, and it is used in an analysis of dropouts from high school. Use of the concept of social capital is part of a general theoretical strategy discussed in the paper: taking rational action as a starting point but rejecting the ...

For many years, the process of the nucleation and growth of nanoparticles have been described through the LaMer burst nucleation and following Ostwald ripening to describe the change in the particles size. This process was originally modeled by Reiss with an accepted model being developed by Lifshitz-Slyozov-Wagner, LSW theory. This was considered to be the only theory of nucleation until ...
