The main objective is to analyze different error sources associated with directional survey in far north, in order to calculate the ellipses of uncertainty. Analyzing and rectifying the error sources may decrease the uncertainty and will lead the well path at the desire location, which is the main concern of this thesis.

Error and Ellipses of Uncertainty Analysis in Far North
Two analytical approaches for constructing the elliptical cone of uncertainty, based on the first-order matrix perturbation and the error propagation method via diffusion tensor representations, are presented and their theoretical equivalence is established.

6) Plot the ellipse: 7a) Plot an ellipse with semi-major and semi-minor axes parallel to the x- and y-axes of the graph, centered at (x,y). These axis lengths are the square roots of the eigenvalues. The larger eigenvalue belongs to the axis with the larger uncertainty:
