Energy Harvesting Systems Principles Modeling

Considering energy saving and real-time monitoring, many researchers have studied advanced power supply systems based on environmental waste energy harvesting to replace traditional chemical batteries and wired power supplies that power WSN nodes (Qian et al., 2018; Alavi et al., 2017; Lin et al., 2017; Cahill et al., 2014). Especially in the ...

The apparent piezoelectricity of biological materials is not yet fully understood at the molecular level. In particular, dynamic noncovalent interactions, such as host-guest binding, are not included in the classical piezoelectric model, which limits the rational design of eco-friendly piezoelectric supramolecular materials. Here, inspired by the conformation-dependent mechanoresponse of the ...
