of these questions, you should be able to answer them in $18/100 * 50 = 9$ minutes 1. In a particular enzyme-catalyzed reaction, $V_{max} = 0.2$ mol/sec and $K_m = 5$ mM.

Assume the enzyme shows standard Michaelis-Menten kinetics. a) (5) What is the rate of the reaction when $[S] = 10$ mM? $v = V_{max}[S]/(K_m + [S])$
 $v = 0.2 \times 10/(5 + 10) =$

KINETICS Practice Problems and Solutions

Enzyme kinetics studies the speed of the reactions catalyzed by enzymes. These studies provide direct information about the mechanism of the catalytic reaction and the specificity of the enzyme. The rate of a reaction catalyzed by an enzyme can be

Download Free Enzyme Kinetics Problems And Answers

measured relatively easily since in many cases it is not necessary to purify or isolate the enzyme.

Enzyme Kinetics: Kinetic Study of Enzymatic Reactions

The effect on kinetics is as if the enzyme were less active (v_{max} is reduced), but that the affinity for substrate is unaffected (K_m remains the same) since the substrate
