Excel Vba For Civil Engineers

ITS#39;s a Excel basics book that every civil engineer should have read by now. It addresses skills that may not be covered in most Excel for civil engineering texts, such as step by step guides to create an application program and how to convert the

An Introduction to EXCEL for Civil Engineers From engineering theory to ...

Excel's TRIM function will remove additional spaces between words. So if there are two spaces between the first and last name, TRIM will remove the additional space. VBA's Trim will not do this. It only removes spaces from the beginning or end of the string. Thanks to Marvin (an Excel Campus Community Member) for bringing this to our attention!
