Magnetic Induction**

Magnetic Induction
Measure the strength and direction of the magnetic field at different locations in a laboratory. Compare the strength of the induced magnetic field to Earth's magnetic field. The direction and magnitude of the inducing current can be adjusted.

Gizmo Warm-up A compass is a useful tool for measuring the direction of a magnetic induction field—more commonly called a magnetic field—because the needle's northern tip points in the direction of a field. In the Magnetic Induction Gizmo™, you will use compasses to

Gizmo of the Week:
Magnetic Induction
Magnetic fields are produced by moving electrical charges and by magnetic materials. Earth has a weak magnetic field that causes compasses to
