As shown by comparing Figs. 5.24 and 5.25, the trough's location of the maximum principal stress curves and the shearing stress curves is the same; it means that the locations of the maximum tensile stress and the maximum shearing stress are the same, and they both appear near the mined-out region.The part of the key stratum where the tensile stress surpasses tensile strength or the shear ...

### Maximum Principal Stress - an overview | ScienceDirect Topics

A steel plate shear wall (SPSW) consists of steel infill plates bounded by a column-beam system. When such infill plates occupy each level within a framed bay of a structure, they constitute a SPSW system. Whereas most earthquake resistant construction methods are adapted from older systems, SPSW was invented entirely to withstand seismic activity.
