Should We Eat Meat?: Evolution and Consequences of Modern ...

Often, his arguments rest on the fact that because humans are evolutionarily optimized to eat meat, we should. This is a fallacy. Modern society routinely dispenses evolutionary goals (e.g. monogamy, having fewer children). We have adopted other values to take its place (such as moral considerations).

Should We Eat Meat?: Evolution and Consequences of Modern ...

'Our ancestors ate meat tho' is the best rationale the author has for why we should eat meat. He acknowledges that humans can be perfectly healthy without exploiting animals but just says 'humans like meat too much to stop so, therefore we won't stop... so therefore it's justified for us to continue'.

Should We Eat Meat?: Evolution and Consequences of Modern ...

There is no doubt that human evolution has been linked to meat in many fundamental ways. Our digestive tract is not one of obligatory herbivores; our enzymes evolved to digest meat whose consumption aided higher encephalization and better physical growth.

Vaclav Smil: Should We Eat Meat? Evolution and Consequence ...

Meat eating is mainly argued due to its nutritional value. As we saw in the history of meat-eating that meat is a more calorie-rich diet than veggies. Meat helps in a better physical growth and provides strength to muscles due to the high quality protein present in it. Nowadays, humans use their brain more than their physical body.
