Damn! I would pay 10K for your car if you were in Adelaide. I am driving one of the worst lemons, Astra TS 2002, with over 176K on the clock. The AC doesn't work, all four tyres are long overdue for change, and the timing belt with the water pump need to be changed at 180K. The body is about to fall apart and don't even get me started with the ...

Recommendations for a Medium Hatch - Budget \$18k - \$22k ...

The Camshaft position sensor detects the position of the camshafts and relays the information to the PCM. The PCM uses the CMP signal to identify the beginning of the injector sequence. What ties these two shafts and their sensors together is the timing belt or chain. The cam and crank should be precisely timed together.

P0016 Crankshaft Camshaft Position Correlation DTC

3. Porcine Squealing. If your car's engine is making a shrieking sound it could be an issue with the serpentine belt. Either the rubber has gotten old and brittle or the tensioner could be failing.
