On Ubuntu 16.04 or below and Debian Stable, you will also need to configure the NodeSource repository to get a new enough version of Node.js. Then you can simply: `sudo apt update && sudo apt install yarn` Note: Ubuntu 17.04 comes with `cmdtest` installed by default.

Installation | Yarn

12.2. Creating Virtual Environments¶. The module used to create and manage virtual environments is called `venv`. `venv` will usually install the most recent version of Python that you have available. If you have multiple versions of Python on your system, you can select a specific Python version by running `python3` or whichever version you want.. To create a virtual environment, decide upon a ...
